

# S<sup>3</sup> Statistical & Spreadsheet Interface Software

## Statistical & Graphical Results on Demand

Look at actual results, statistical analysis of the data, and graphical results such as X-Bar, Range, Histogram, Individual Test Points, and Force vs. Length graphs with the click of a button.

## Total Spring Inspection

The S<sup>3</sup> software can connect to the Larson DHT family, accept keyboard input, and talk to almost any RS 232 device to combine the entire inspection process. Bring data into the computer to create one comprehensive report of all spring features.

## Improved File Management

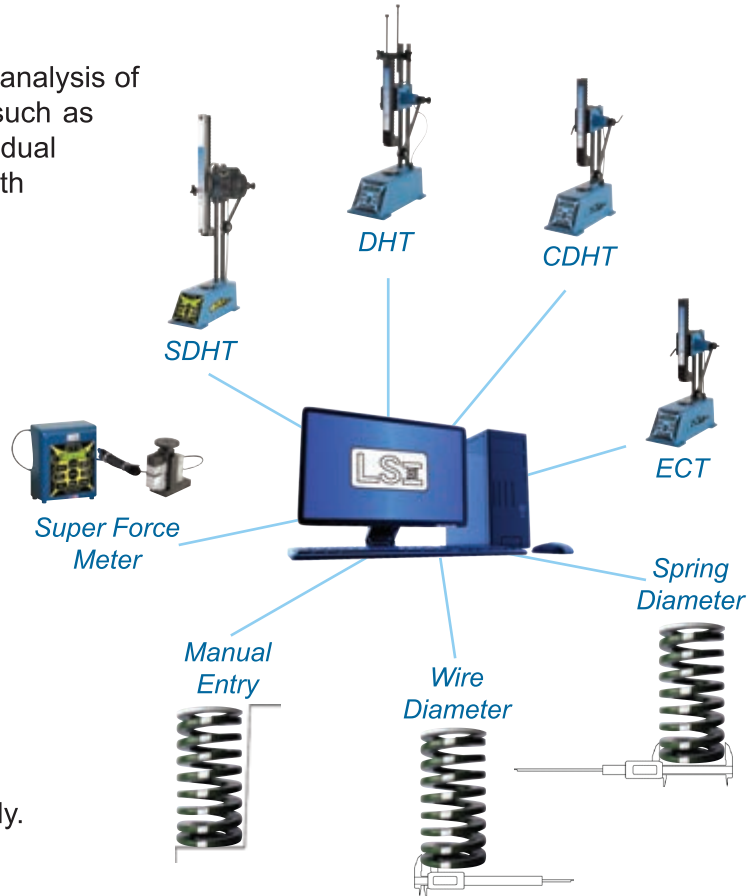

Now you can see all your results in one file. Merge together yesterday's, last week's, and even last year's results into one file; great for gage tracking. In addition to combining files, you can add new data to existing files. Add your new data to the file you began yesterday or last year—nice and tidy.

## Dynamic Data Exchange (DDE)

S<sup>3</sup> software can communicate to spreadsheets like Excel or an SPC program using Dynamic Data Exchange. It's fast, simple, and in the background so you can keep using your tried and true SPC programs. Do you have an SPC that doesn't have DDE capability? Our S<sup>3</sup> has a "Send Keys" communication method that imitates keystrokes; so if your program accepts keystrokes, this is perfect for you.

## RS 232 Data Gathering Into Your Computer

S<sup>3</sup> can communicate with virtually any device that uses standard RS 232 protocols. This includes the Larson DHT family, multimeters, and even competitors' testers. Now instead of having to enter data by hand from your measuring devices, you can let S<sup>3</sup> do the work for you.

## SPECIFICATIONS

- **Tester Compatibility**  
Any tester with an RS 232 port.
- **Computer Compatibility**  
Requires 486 IBM-compatible or better running Windows 3.1, 3.11, 9X, NT, Windows 2000, XP Pro or Windows 7.
- **Tester-to-Computer Cable**  
Included with the SSS Software.
- **Online Demos for Reference**  
Two demos that focus on different aspects of S<sup>3</sup> and how to use them efficiently.

### To Order S<sup>3</sup> Software

| Part Number      | Description  |
|------------------|--|
